Hiring Manager

Smartly.io

Helsinki, Finland

Dear Hiring Manager,

I am excited to apply for the Junior Software Engineer position at Smartly.io. With a strong background in backend and frontend development, I am eager to contribute my expertise in JavaScript, Node.js, React, and SQL to help build scalable data solutions and optimize reporting tools that impact thousands of marketers worldwide.

My experience includes working as a Full-Stack Developer Trainee at Integrify Oy, where I collaborated on real-world projects involving JavaScript, TypeScript, React, Redux, and Node.js. Additionally, at EuroCarWash Oy, I developed software solutions leveraging Java, AngularJS, MySQL, and Bootstrap, including a contract automation system. Throughout my career, I have worked extensively with relational databases, including PostgreSQL and MySQL, and have hands-on experience developing APIs and optimizing data flows. Please go through my [Github](#) I have multiple projects made by React and Nodejs which shows my skills.

What excites me about Smartly.io is the opportunity to work on large-scale data processing systems and collaborate with experienced engineers in a dynamic and innovative environment. My problem-solving mindset, combined with my ability to work effectively in a team, aligns well with the role's responsibilities. Furthermore, I am based in Helsinki and fully open to the hybrid work model.

I would welcome the opportunity to discuss how my skills and experience can contribute to Smartly.io's success. Please feel free to contact me at any time.

Looking forward to your response.

Best regards,

Zeriab Chiah
